

About Us: NPC-QIC was founded in 2008 with a mission to decrease mortality and improve quality of life for infants with single ventricle congenital heart disease and their families. There are 69 participating cardiology care centers across the US, Canada, and the UK. NPC-QIC has close to 2,000 participants including physicians/researchers, team members (e.g., nursing, administrative and research), and parent/patients. NPC-QIC's registry has more than 5700 patients in its Phase 1 and Phase II registries. NPCQIC has reduced interstage mortality by 40%, identified a growth bundle and reduced growth failure by 30%, developed a risk score for interstage mortality, and significantly increased the use of a medication associated with survival. For more information: www.npcqic.org

Our Vision: Our vision is to dramatically improve the outcomes of care for children with cardiovascular disease.

Our Current Goals:

- Focus on Health Equity initiative in collaboration with other pediatric cardiology networks
- Spread project from 9 pilot centers to all 69 sites to reduce unplanned reinterventions post-surgery
- Support use of toolkits to improve quality of life outcomes: 1) oral feeding (pre-operative & tube weaning) and 2) gross motor development and assess impact on related outcome measures

Exciting Work: Using co-produced toolkits, the network aims to increase the % of infants who can eat cake at their first birthday (!) and increase the % of infants followed with a developmental plan. A workgroup will begin design to support infants from 1st birthday to Fontan surgery (at about 3-4 years).

Summary of Core Strategic Priorities:

Leadership & Project Teams: Our Team — NPC-QIC (npcqic.org)

Network Structure (e.g., org chart):

Network Toolkits & Change Packages:

Oral Feeds Prior to Stage 1 Surgery Toolkit

Optimizing Neurodevelopment & Supporting Infant Gross Motor Outcomes

Toolkit

Access the Tube Weaning Toolkit

The NPC-QIC Updated Interstage Change Package

Measures:

Last Revised: May, 2023

Description of Data Repository (e.g., # patients, etc.):

Data collection: REDCap# of patients enrolled: 3597

Funding Sources:

• Care Center Participation Fees

Publications: Research Publications — NPC-QIC (npcqic.org)

NPC-QIC reduced interstage mortality by 40%, significantly increasing the number of infants with hypoplastic left heart syndrome who survive to their second open heart surgery.
